PROFILE SUMMARY

B.Tech Computer Science student (**penultimate year, 2024–2028**) at Invertis University with strong foundations in **DSA**, **Distributed Systems**, and **Software Engineering**. Proficient in Python, Java, C++, and JavaScript. Built production-deployed systems: cloud platforms (AWS EC2), distributed IoT sensor networks (MQTT/ESP32), and AI-integrated applications. Solved **800+ LeetCode problems** (Global Rank **61,127**). Google Gemini Student Ambassador.

EDUCATION

B.Tech – Computer Science & Engineering
Invertis University, Bareilly, Uttar Pradesh, India

2024 – 2028

EXPERIENCE

Google Gemini Student Ambassador
Google

May 2026 – Present

- Organized 3 technical workshops on Gemini API and LLM development, engaging 100+ students and developers across India; served as campus liaison to Google's developer relations team.

Java Full Stack Internship
EduSkills Academy

Mar 2026

- Deployed 2 production-ready applications on AWS EC2; reduced deployment time by 40% via CI/CD pipelines and improved backend response time by 30% through query optimization; designed REST APIs with Spring Boot and Hibernate using multi-layered architecture.

AI-ML Virtual Internship

EduSkills – AICTE – Google for Developers Education Initiative

Oct – Dec 2025

- Engineered 3 supervised ML models using Python and Scikit-learn (preprocessing, feature engineering, evaluation); certified by AICTE and Ministry of Education.

TECHNICAL SKILLS

Languages (<i>Proficient</i>):	Python, Java, C++, JavaScript, MySQL
DSA:	Arrays, Linked Lists, Trees, Graphs, Heaps, Hash Maps, Dynamic Programming, Greedy, Backtracking
Distributed Systems & Design:	REST APIs, Multi-layered Architecture, ORM, Distributed IoT Networks (MQTT), Docker, Microservices
Web / Backend:	React.js, Node.js, Express.js, Spring Boot, Hibernate, Bootstrap
Cloud / DevOps:	AWS EC2, Git, GitHub, Vercel, Docker, CI/CD Pipelines, Postman
AI / ML:	Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Gemini API
CS Fundamentals:	Operating Systems, Computer Networks, DBMS, Concurrency, Software Engineering

PROJECTS

Student Coding Platform – Scalable Web System
React.js, Node.js, Express.js, REST API, AWS EC2 Solo

2025

- Architected and deployed a LeetCode-style platform (code editor, 50 problems, leaderboard, auth) on AWS EC2 with a decoupled stateless REST API supporting horizontal scalability and concurrent session handling; adopted by 30 students within the first month.

IIoT – Distributed Sensor Network
ESP32, RFID, Python, MQTT Protocol, Cloud Storage Team Leader

2024

- Led a 4-member team to build a distributed IoT system of ESP32 nodes over MQTT with a fault-tolerant concurrent event pipeline for real-time cloud sync; eliminated 100% of manual errors and reduced recording time by 80%.

LRU & LFU Cache – Systems Design in C++
C++, GitHub Data Structures & Algorithms

2024

- Implemented O(1) LRU Cache (HashMap + DLL) and O(1) LFU Cache (frequency map + LRU tie-breaking) from first principles in C++ with clear complexity guarantees; published open-source with 100% test coverage.

Plant Disease Detection – AI-Integrated System
Python, TensorFlow, Keras, CNN, Docker In Progress

2026

- Designing an end-to-end system: CNN-based inference service, REST backend API, and frontend interface – containerized with Docker for reproducibility; targeting deployment on cloud infrastructure.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

LeetCode: 767 problems | Global Rank 61,127 | 100 Days Badge 2025 & 2026 • **GFG** (aakasho65a): Arrays, Trees, Graphs, DP
• **GitHub:** 25+ repositories

Gemini Student Ambassador – Google (May 2026) • **AICTE AI-ML Intern** – Google for Developers (2025) • **AI Skills Passport** – EY & Microsoft • **LLM for Young Developers** – INDIAai, Meta (2026) • **JNV** – National exam
